SUMMARY

Full Stack Java Developer with hands-on experience in Spring Boot, React.js, MySQL, and RESTful APIs. Skilled in building LLM-integrated applications using LangChain, RAG pipelines, Retrieval-Augmented Generation, and vector databases (ChromaDB). Passionate about developing scalable AI-integrated software solutions.

EDUCATION

Adikavi Nannaya University

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.1/10

Rajahmundry, Andhra Pradesh

Oct 2022 – April 2026

EXPERIENCE

Full Stack Developer Intern

Feb 2025 – Present

Infosys Springboard

Remote

- Developed a full-stack **Wellness Marketplace** platform using Spring Boot REST APIs, React.js, and MySQL with JWT-based authentication and role-based access control.
- Designed normalized relational database schemas for users, therapy sessions, products, and reviews; optimized SQL queries for performance.
- Integrated AI-powered recommendation engine using Spring AI and Gemini LLM with external health APIs for personalized therapy suggestions.
- Built responsive frontend using React.js and Tailwind CSS with reusable component architecture.

Java Full Stack Developer Intern

May 2025 – Jun 2025

Spypro Security Solutions

Remote

- Built Spring Boot REST APIs with global exception handling and input validation, reducing response time by 30%.
- Developed a responsive Bootstrap UI with dynamic components and modular JavaScript, boosting user engagement by 40%.
- Resolved frontend-backend integration issues and secured MySQL interactions using parameterized queries, ensuring data consistency and preventing SQL injection.
- Improved API reliability by optimizing request handling and reducing redundant database calls.

PROJECTS

AI Tutor Learning Platform | *Bootstrap, Spring Boot, MySQL, FastAPI, LangChain*

- Architected a peer-to-peer learning platform with Bootstrap frontend, Spring Boot backend, and MySQL, supporting user interactions.
- Integrated AI tutor agent using RAG, LangChain, FastAPI, Gemini LLM, and ChromaDB, improving answer relevance by 30%.
- Built document processing pipeline handling documents with text extraction, embeddings, and semantic search for contextual responses.
- Developed REST APIs for authentication, session management, and role-based access control with optimized response time.

Breakout Game | *HTML5, Bootstrap, JavaScript, Spring Boot, MySQL*

- Developed a browser-based Breakout game using HTML5 Canvas with real-time rendering and dynamic ball physics.
- Built RESTful APIs using Spring Boot and integrated MySQL to store player scores and manage leaderboard data for game sessions.
- Designed a responsive UI using Bootstrap, ensuring cross-browser compatibility and reducing layout issues by 30%.
- Applied modular JavaScript design and debugging techniques to enhance code maintainability and reduce runtime errors.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Web & Frameworks: HTML, CSS, Bootstrap, Spring Boot, Hibernate/JPA, RESTful APIs, FastAPI,

AI / ML: LangChain, RAG, ReAct Agent, Prompt Engineering, LLMs, Vector Databases, HuggingFace Embeddings, ChromaDB,

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Linux (Ubuntu)

CERTIFICATIONS

- Crash Course on Python – **Google (Coursera)**
- Core Java Certification – **Internshala Trainings**

LANGUAGES KNOWN

Telugu – Native **English** – Professional Proficiency
