SUMMARY

Java Full Stack Developer with experience in Spring Boot, React.js, MySQL, and RESTful APIs. Skilled in AI/ML technologies including LangChain, RAG pipelines, and vector databases. Passionate about building scalable, high-performance software solutions integrated with modern AI capabilities.

EDUCATION

Adikavi Nannaya University

B.Tech in Computer Science and Engineering | CGPA: 8.1/10

Rajahmundry, Andhra Pradesh

2022 – 2026

EXPERIENCE

Java Full Stack Developer Intern

May 2025 – Jun 2025

Spypro Security Solutions

Remote

- Built Spring Boot REST APIs with exception handling and input validation, reducing response time by 30%.
- Developed a responsive Bootstrap UI with dynamic components, boosting user engagement by 40%.
- Resolved frontend-backend integration bugs and secured MySQL interactions, ensuring data consistency.
- Collaborated on Agile sprints, performed code reviews, and maintained Git version control for team codebase.

AI/ML Intern

May 2024 – Jun 2024

IBM SkillsBuild & Edunet Foundation

Remote

- Built a Python NLP sentiment classification model categorizing text into positive, negative, or neutral classes.
- Executed full ML pipeline: data preprocessing, feature engineering, model training, and hyperparameter tuning.
- Gained hands-on experience in AI fundamentals, model deployment, and prediction evaluation using Google Colab.
- Analyzed model performance metrics and applied optimization techniques to improve classification accuracy.

PROJECTS

AI Tutor Learning Platform | React.js, Spring Boot, MySQL, FastAPI, LangChain, Gemini API, ChromaDB Aug 2025

- Architected a 3-tier peer-to-peer learning platform with React.js frontend, Spring Boot backend, and MySQL.
- Integrated an AI tutor using RAG, LangChain, and Gemini LLM with ChromaDB for context-aware question answering.
- Built a document upload pipeline with text extraction, vector embeddings, and semantic search for personalized learning.
- Developed REST APIs for user authentication, session management, and content access control.

Breakout Game | HTML, CSS, JavaScript, Bootstrap, Spring Boot, MySQL

Jun 2025

- Built a browser-based Breakout game using HTML5 Canvas with real-time gameplay and dynamic ball physics.
- Implemented collision detection, score tracking, brick-breaking logic, and optimized cross-browser rendering.
- Integrated Spring Boot backend with MySQL to store player scores and manage leaderboard data via REST APIs.
- Deployed the application with a clean UI using Bootstrap, ensuring seamless responsiveness across all devices.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Web Technologies: HTML, CSS, React.js, Bootstrap

Frameworks & APIs: Spring Boot, RESTful APIs, Hibernate/JPA, JUnit, FastAPI,

AI / ML: Prompt Engineering, LangChain, RAG, Embeddings, Vector Databases, LLMs

Databases: MySQL, PostgreSQL

Cloud & DevOps: AWS, Linux (Ubuntu), Git, GitHub, CI/CD, Docker, Kubernetes

Tools: IntelliJ IDEA, VS Code, Postman, Google Colab

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

LANGUAGES KNOWN

Telugu – Native **English** – Professional Proficiency

CERTIFICATIONS

- Crash Course on Python - **Google (Coursera)**
- Core Java Certification -**Internshala**
